ENZYMATIC PRESOAK AND DETARNISHER

Product Properties

COLOR: White Powder
ODOR: Pleasant
pH: 10.0
FOAMING: Excellent
DETERGENCY: Excellent
HARD WATER TOLERANCE: Excellent

Description

This powdered silver and stainless pre-soak is free-flowing, easily dispersible, and removes tough food soils and film from flatware so that they may be completely cleaned by the dishwasher. It is also excellent for pre-soaking pots and pans, spatulas, grease traps, oven racks and other heavily soiled kitchen items. This product uses electrolytic chemical action to lift and remove tarnish and tough food soils from silverware. It is effective, yet safe, on delicate silver surfaces and will not pit, scratch or damage when used as directed.

Directions

STAINLESS FLATWARE - Dissolve 1 to 2 ounces of powder per gallon of warm water in a sink or other vessel. Soak flatware from 1 to 5 minutes depending on soil, then rack and pass through dishwasher. They will come out clean, shiny, and spot-free.

SILVER PRESOAK - Dissolve 2 to 4 ounces of powder per gallon of warm water in a vessel lined with aluminum foil. As silverware is brought back to washing area, place it in this vessel. Allow it to soak a few minutes then rack and pass through dishwasher. Silverware will be cleaner and shine like never before.

FAST DETARNISHING - Dissolve 2 to 4 ounces of powder per gallon of hot water in a vessel lined with aluminum foil. Place silverware in a basket and soak in this solution 1 to 3 minutes. Withdraw silverware, rinse in hot water and dry to a shine. (NOTE: Do not allow silver to soak too long as this will cause redeposition of aluminates on your utensils.)

Safety Information

KEEP OUT OF REACH OF CHILDREN

CAUTION

Causes irritation or burns to eyes and skin. Contains alkaline builders. Avoid contact with eyes and skin. In case of contact, flush immediately with plenty of water. If irritation persists, get medical attention. For eyes, flush immediately with water for 15 minutes. Get medical attention.
